Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

WO 95/08910 A describes a membrane (32 or 60) that serves as a type of return spring.

In order to achieve uniform contact pressure of contact elements on the counter contacts, it is not possible to mount more than two contact elements together by means of one membrane.

The subject matter of claim 1 therefore meets the requirements of PCT Article 33(3).

Claims 2 to 16 are dependent on claim 1, and therefore also meet the requirements of PCT Article 33(3).
